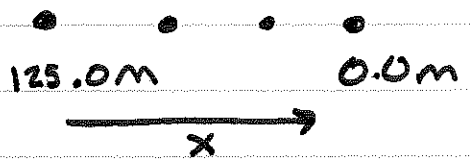
Physics Module 2 p. 42 #10-13

10) The car starts at 125.0m and moves toward the Origin. Arrives at the Origin 5.0 seconds after it Begins to move. The Car continues Beyond the origin.

11) $t_0 = 0.0s$ $t_5 = 5.0s$



12) A) 4.0 seconds
B) 100.0m east of origin
C) 100-50 = 50
∴ 50.0m to the West

East
west

13) · Both walk same distance, during ~~the~~ each time Interval
· Both walk East entire time
· A - starts west of origin, walks toward origin, continues East
· B - starts East of origin, walks East

East
west
