

Design an experiment involving _____ and _____ . (YOU pick what the blanks are!)

Include the following:

Research question

Controlled variables/constants (at least 3)

Independent Variable

Dependent Variable

Control group

Make sure to that you indicate what each one of these things will be in your experiment. **Include a simple procedure.** (what are you going to do to perform your experiment?) Make sure that you explain your experiment carefully, a picture or data table are appropriate, but make sure that you include an explanation.
